Move, Update, Automate.

Scale

Time constraints, legal mandates or massive content volumes? With FileMatica's unique multi-threaded, multi-instance software solution it will allow you to scale your environment horizontally and vertically to meet the needs of your organization.

Bulk Operations

FileMatica allows you to easily manage large content processes such as Bulk Loading, Bulk Import/Export, Bulk Metadata updates and much more in an easy to use dashboard.

Migrate Consolidate

Filematica simplifies high volume content migrations and repository consolidations. Migrate content from one ECM system to another, from your old system to the new or consolidate multiple repositories.

Validate

FileMatica gives you validation and auditing capabilities that enables timely data recovery and batch validation through dash-boards and control console.

Synchronous/Asynchronous

FileMatica allows you to process or move content from one system to another in a single operation or, transfer content and its associated metadata to moveable media for transportation to another location.
